

WHOLESALE PRICE LIST

FALL 1958 - - - SPRING 1959

A. McGILL & SON
WHOLESALE NURSEYMEN

FAIRVIEW, OREGON

TO THE TRADE

In offering the following list of nursery stock we wish to emphasize the fact that it is grown on non-irrigated soil under natural growing conditions and is well ripened before digging. The long growing season and plentiful rainfall of the Willamette Valley are conducive to rapid growth but proper maturing of all stock is easily controlled by cultivation.

PRICES are based on present market conditions and subject to change without notice. All quotations are subject to previous sale and all prices are made for the use of established nurserymen only.

ALL PRICES F.O.B. FAIRVIEW, OREGON.

TERMS. 2% discount 10 days—Net 60 days from date of invoice for those whose responsibility is known to us. Satisfactory references are required from unknown parties. Interest at 6% per annum will be charged on overdue accounts.

ORDERS are booked subject to crop conditions or errors in count, and with the understanding that same shall be void should injury befall stock because of hail, fire, frost or other cause beyond our control.

GRADE STANDARDS are those adopted by the American Association of Nurserymen.

PACKING. All boxing or baling charges at cost. No charge is made when stock is packed in bulk in a car.

SHIPPING. In making our Eastern shipments, we use combination or pool cars to several distributing points throughout the East and Middle West. This greatly reduces the freight charges and makes our stock as reasonable as any. L.C.L. railroad freight, auto freight or express shipments promptly handled.

INSPECTION CERTIFICATES will be furnished with each shipment.

CLAIMS for any cause must be made promptly on receipt of shipment. Any stock rejected must be reported immediately and held for advice from us as to disposition but in no case should it be returned to us without authority. We will cheerfully allow credit for proven unsatisfactory stock but will not entertain claims after stock has been once accepted.

GUARANTEE. WE GIVE NO WARRANTY, EXPRESS OR IMPLIED, AS TO LIFE, DESCRIPTION, QUALITY, PRODUCTIVENESS, OR ANY OTHER MATTER, OF ANY NURSERY STOCK OR PLANTS THAT WE SELL. SHOULD ANY STOCK PROVE UNTRUE TO NAME AS LABELED, IT IS MUTUALLY AGREED THAT OUR TOTAL LIABILITY, UPON SATISFACTORY PROOF, SHALL BE LIMITED TO OUR REPLACING FREE OR REFUNDING THE PURCHASE PRICE.

Respectfully,

A. MCGILL & SON.

FRUIT TREE SEEDLINGS

Seedlings are tied $\frac{1}{4}$ inch and No. 1, 100 per bundle. No. 2 and No. 3, 200 per bundle. Please order accordingly. Under 600 of one variety and grade at 100 rate.

HONEYLOCUST (Cont'd)

"MORaine ® LOCUST"

(Plant Patent No. 836)

A new and improved form of thornless Honey-Locust. Noted for its freedom from seed pods and thorns, graceful vase shape, lace-like foliage, ability to stand almost any growing conditions.

This variety of Honeylocust tree is a patented variety covered by United States Plant Patent No. 836 and is being handled under license from the Siebenthaler Company, owner of the registered trademark "Moraine" in the United States and Canada.

5-6 feet, whips	2.25	2.00	1.80
4-5 feet, whips	1.90	1.65	1.40

SKYLINE LOCUST

(Plant Patent No. 1619)

An unusual variety of distinctive pyramidal form. Foliage is dark green and leaflets are larger and more closely spaced than the average Honeylocust. It develops a strong trunk and shapely crown without being staked or specially trimmed. Branches are uniformly spaced, resulting in a well filled rather formal appearing tree.

Practically all flowers are male but infrequently a polygamous flower has appeared in which a single floret is female. Only a small percentage of these are pollinated, therefore seeding is of minor importance. Grown and sold by us under license from the patent owner.

SHADE AND ORNAMENTAL TREES (Cont'd)

HONEYLOCUST (Cont'd)

"SUNBURST LOCUST"

(Plant Patent No. 1313)

A new and distinct type of Honey Locust. The bright golden foliage on 8 to 10 inches of the branch tips contrasts beautifully with the rich green of the rest of the tree. Broad pyramidal shape with excellent branching habit.

We are growing and selling it under license from the patent owner.

CRIMSON KING MAPLE

(Acer platanoides schwedleri Nigra)

Plant Patent No. 735

Unquestionably, the most beautiful of all Maple shade trees, CRIMSON KING is the **only** variety in existence that retains its rich dark crimson color throughout the entire growing season.

Somewhat slower in growth than the Schwedler Maple it is by far the most striking shade tree to be introduced in many years.

Crimson King Maple will again be publicized by national advertising. Beautiful four-color folders are available for your use as bill stuffers, hand out pieces and direct mail advertising.

We are growing it under license from the Patent Owner.

**“CRIMSON
KING”
MAPLE**

CRIMSON KING

Unquestionably, the most beautiful of all Maple Shade Trees. *Crimson King* is the only variety in existence that retains its rich, dark, crimson color throughout the entire growing season.

Crimson King is easily recognized by the glistening, satiny sheen of its lovely dark red foliage. The distinctive, deep brilliant color of this outstanding specimen tree creates an exciting contrast to lawns and shrubs throughout the spring, summer and fall. Excellent for large or small lawns.
